Non-Metallic Minerals and Their Products (except Chemicals)	7010 to 7690
Chemicals and Allied Products	8020 to 8490
Miscellaneous Commodities	9020 to 9590
Exports of Foreign Produce, by Articles	10 to 9590
VALUE AND VOLUME at end of report	

EXPLANATORY NOTES

1. In all the tables of exports in this Report, the quantities and values are based upon the declarations of exporters (export entries), as subsequently checked by Customs officials.

2. Weight, where shown, is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs tariff.

3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

4. In this Report are trade items such as "Gas engines and parts", which show both quantities and values. In the item "Gas engines and parts" the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.

5. "Exports of Canadian Produce" include not only articles of purely Canadian origin but also imported articles of foreign origin which have been changed in form or enhanced in value by further manufacture in Canada, such as sugar refined from imported raw sugar, and rubber goods made from imported unmanufactured rubber.

6. The value of "Exports of Canadian Produce" is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges.

7. "Exports of Foreign Produce" consist of commodities which have been exported from Canada in the same condition as when imported. The value is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges, when exported from Canada.

8. Exports from Canada are credited to the country to which they are consigned, whether that country possesses a seaboard or not. The country of consignment is the country to which goods are intended to pass, without interruption of transit, except in the course of transhipment or transfer from one means of conveyance to another.

9. The initials "N.O.P." mean "not otherwise provided for".

10. Some of the descriptions of articles used in this Report are abbreviated and incomplete, due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed Report of the Trade of Canada.

11. Throughout this Report, figures are subject to revision.

12. The Foreign Trade of Newfoundland is included as from April 1, 1949.

KEY TO ABBREVIATIONS OF COUNTRIES

Note:— The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in Volume I of the Annual Report of the Trade of Canada.

U Kingdom	United Kingdom
Aden	Aden
E E Afr	British East Africa

Value, Price and Volume Indexes of Exports of Canadian Produce

The following table gives index numbers of the declared (statistical) value of exports of Canadian produce by months, and of the unit value (price) and volume of these exports. The value index expresses the value of exports in a given month as a percentage of the monthly average in the base year. The price index is of the fixed-weight aggregative (Laspeyre) type, and combines unit values calculated from the monthly export statistics with specified wholesale or other price quotations. These latter quotations are used where inadequate quantity reporting in the trade statistics prevents the obtaining of sufficiently representative unit value series. The volume index is derived by dividing the value index by the corresponding price index, and is, therefore, of the currently-weighted (Paasche) type. Until a suitable post-war reference base is determined for the Bureau of Statistics, these indexes will be computed with 1948 as an interim reference base.

In computing the price index certain minor adjustments were made to the regular grouping of commodities used in the trade statistics, and all three indexes are presented on the basis of these adjusted groups. The adjustments are as follows: the two groups "agricultural and vegetable products" and "animals and animal products" have been combined into one group now titled "agricultural and animal products"; the sub-group "rubber and its products" has been transferred to the "miscellaneous products" group; the item "ships" (9400) has been transferred to the "iron and steel and their products" group.

These indexes are currently computed from the original data for months and calendar years only. Approximate indexes for intermediate periods may be obtained by averaging the monthly values. Although such indexes will be less accurate than would result from a separate computation based on the original data, the margin of error is insufficient to justify a lengthy separate computation.

A complete record of these series by months for the post-war period is published in Volume I of the annual report "Trade of Canada". Some additional commodity information appears in issues of the "Review of Foreign Trade". Details of the computation of the price indexes are given in D.B.S. Reference Paper, No. 8, 1950, titled "Export and Import Price Indexes by Months, July, 1945 – June, 1950 (1948 = 100)".

Monthly Index Numbers of Declared Values, Prices and Physical Volume of Exports of Canadian Produce, by Groups

Wood, Wood Products and Paper	4010 to 4990
Iron and Its Products	5010 to 5970
Non-Ferrous Metals and Their Products (except Gold)	6010 to 6680
Non-Metallic Minerals and Their Products (except Chemicals)	7010 to 7690
Chemicals and Allied Products	8020 to 8490
Miscellaneous Commodities	9020 to 9590
Exports of Foreign Produce, by Articles	10 to 9590
VALUE AND VOLUME at end of report	

EXPLANATORY NOTES

1. In all the tables of exports in this Report, the quantities and values are based upon the declarations of exporters (export entries), as subsequently checked by Customs officials.

2. Weight, where shown, is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs tariff.

3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

4. In this Report are trade items such as "Gas engines and parts", which show both quantities and values. In the item "Gas engines and parts" the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.

5. "Exports of Canadian Produce" include not only articles of purely Canadian origin but also imported articles of foreign origin which have been changed in form or enhanced in value by further manufacture in Canada, such as sugar refined from imported raw sugar, and rubber goods made from imported unmanufactured rubber.

6. The value of "Exports of Canadian Produce" is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges.

7. "Exports of Foreign Produce" consist of commodities which have been exported from Canada in the same condition as when imported. The value is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges, when exported from Canada.

8. Exports from Canada are credited to the country to which they are consigned, whether that country possesses a seaboard or not. The country of consignment is the country to which goods are intended to pass, without interruption of transit, except in the course of transhipment or transfer from one means of conveyance to another.

9. The initials "N.O.P." mean "not otherwise provided for".

10. Some of the descriptions of articles used in this Report are abbreviated and incomplete, due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed Report of the Trade of Canada.

11. Throughout this Report, figures are subject to revision.

12. The Foreign Trade of Newfoundland is included as from April 1, 1949.

KEY TO ABBREVIATIONS OF COUNTRIES

Note:— The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in Volume I of the Annual Report of the Trade of Canada.

U Kingdom	United Kingdom
Aden	Aden

Value, Price and Volume Indexes of Exports of Canadian Produce

The following table gives index numbers of the declared (statistical) value of exports of Canadian produce by months, and of the unit value (price) and volume of these exports. The value index expresses the value of exports in a given month as a percentage of the monthly average in the base year. The price index is of the fixed-weight aggregative (Laspeyre) type, and combines unit values calculated from the monthly export statistics with specified wholesale or other price quotations. These latter quotations are used where inadequate quantity reporting in the trade statistics prevents the obtaining of sufficiently representative unit value series. The volume index is derived by dividing the value index by the corresponding price index, and is, therefore, of the currently-weighted (Paasche) type. Until a suitable post-war reference base is determined for the Bureau of Statistics, these indexes will be computed with 1948 as an interim reference base.

In computing the price index certain minor adjustments were made to the regular grouping of commodities used in the trade statistics, and all three indexes are presented on the basis of these adjusted groups. The adjustments are as follows: the two groups "agricultural and vegetable products" and "animals and animal products" have been combined into one group now titled "agricultural and animal products"; the sub-group "rubber and its products" has been transferred to the "miscellaneous products" group; the item "ships" (9400) has been transferred to the "iron and steel and their products" group.

These indexes are currently computed from the original data for months and calendar years only. Approximate indexes for intermediate periods may be obtained by averaging the monthly values. Although such indexes will be less accurate than would result from a separate computation based on the original data, the margin of error is insufficient to justify a lengthy separate computation.

A complete record of these series by months for the post-war period is published in Volume I of the annual report "Trade of Canada". Some additional commodity information appears in issues of the "Review of Foreign Trade". Details of the computation of the price indexes are given in D.B.S. Reference Paper, No. 8, 1950, titled "Export and Import Price Indexes by Months, July, 1945 – June, 1950 (1948 = 100)".

	Page / Class Number
EXPLANATORY NOTES	2
KEY TO ABBREVIATIONS OF COUNTRIES	3
SUMMARY TABLES:	
Exports of Canadian Produce, by Countries	4
Exports of Foreign Produce, by Countries	5
Exports of Canadian Produce, by Main Groups	6
DETAILED TABLES:	
Exports of Canadian Produce, by Articles and Countries:	
Agricultural and Vegetable Products (except Chemicals, Fibres and Wood):	Class Number
A – Mainly Food	10 to 800
B – Other than Food	1010 to 1730
Animals and Animal Products (except Chemicals and Fibres)	2010 to 2860
Fibres, Textiles and Textile Products	3010 to 3460
Wood, Wood Products and Paper	4010 to 4990
Iron and Its Products	5010 to 5970
Non-Ferrous Metals and Their Products (except Gold)	6010 to 6680
Non-Metallic Minerals and Their Products (except Chemicals)	7010 to 7690
Chemicals and Allied Products	8020 to 8490
Miscellaneous Commodities	9020 to 9590
Exports of Foreign Produce, by Articles	10 to 9590
VALUE AND VOLUME at end of report	

EXPLANATORY NOTES

1. In all the tables of exports in this Report, the quantities and values are based upon the declarations of exporters (export entries), as subsequently checked by Customs officials.

2. Weight, where shown, is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs tariff.

3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

4. In this Report are trade items such as "Gas engines and parts", which show both quantities and values. In the item "Gas engines and parts" the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.

5. "Exports of Canadian Produce" include not only articles of purely Canadian origin but also imported articles of foreign origin which have been changed in form or enhanced in value by further manufacture in Canada, such as sugar refined from imported raw sugar, and rubber goods made from imported unmanufactured rubber.

6. The value of "Exports of Canadian Produce" is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges.

7. "Exports of Foreign Produce" consist of commodities which have been exported from Canada in the same condition as when imported. The value is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges, when exported from Canada.

8. Exports from Canada are credited to the country to which they are consigned, whether that country possesses a seaboard or not. The country of consignment is the country to which goods are intended to pass, without interruption of transit, except in the course of transhipment or transfer from one means of conveyance to another.

9. The initials "N.O.P." mean "not otherwise provided for".

10. Some of the descriptions of articles used in this Report are abbreviated and incomplete, due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed Report of the Trade of Canada.

11. Throughout this Report, figures are subject to revision.

12. The Foreign Trade of Newfoundland is included as from April 1, 1949.

KEY TO ABBREVIATIONS OF COUNTRIES

Note:— The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in Volume I of the Annual Report of the Trade of Canada.

U Kingdom	United Kingdom
Aden	Aden

Value, Price and Volume Indexes of Exports of Canadian Produce

The following table gives index numbers of the declared (statistical) value of exports of Canadian produce by months, and of the unit value (price) and volume of these exports. The value index expresses the value of exports in a given month as a percentage of the monthly average in the base year. The price index is of the fixed-weight aggregative (Laspeyre) type, and combines unit values calculated from the monthly export statistics with specified wholesale or other price quotations. These latter quotations are used where inadequate quantity reporting in the trade statistics prevents the obtaining of sufficiently representative unit value series. The volume index is derived by dividing the value index by the corresponding price index, and is, therefore, of the currently-weighted (Paasche) type. Until a suitable post-war reference base is determined for the Bureau of Statistics, these indexes will be computed with 1948 as an interim reference base.

In computing the price index certain minor adjustments were made to the regular grouping of commodities used in the trade statistics, and all three indexes are presented on the basis of these adjusted groups. The adjustments are as follows: the two groups "agricultural and vegetable products" and "animals and animal products" have been combined into one group now titled "agricultural and animal products"; the sub-group "rubber and its products" has been transferred to the "miscellaneous products" group; the item "ships" (9400) has been transferred to the "iron and steel and their products" group.

These indexes are currently computed from the original data for months and calendar years only. Approximate indexes for intermediate periods may be obtained by averaging the monthly values. Although such indexes will be less accurate than would result from a separate computation based on the original data, the margin of error is insufficient to justify a lengthy separate computation.

A complete record of these series by months for the post-war period is published in Volume I of the annual report "Trade of Canada". Some additional commodity information appears in issues of the "Review of Foreign Trade". Details of the computation of the price indexes are given in D.B.S. Reference Paper, No. 8, 1950, titled "Export and Import Price Indexes by Months, July, 1945 – June, 1950 (1948 = 100)".

Chemicals and Allied Products	8020 to 8490
Miscellaneous Commodities	9020 to 9590
Exports of Foreign Produce, by Articles	10 to 9590
VALUE AND VOLUME at end of report	

EXPLANATORY NOTES

1. In all the tables of exports in this Report, the quantities and values are based upon the declarations of exporters (export entries), as subsequently checked by Customs officials.

2. Weight, where shown, is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs tariff.

3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

4. In this Report are trade items such as "Gas engines and parts", which show both quantities and values. In the item "Gas engines and parts" the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.

5. "Exports of Canadian Produce" include not only articles of purely Canadian origin but also imported articles of foreign origin which have been changed in form or enhanced in value by further manufacture in Canada. such as sugar refined from imported raw sugar, and rubber goods made from imported unmanufactured rubber.

6. The value of "Exports of Canadian Produce" is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges.

7. "Exports of Foreign Produce" consist of commodities which have been exported from Canada in the same condition as when imported. The value is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges, when exported from Canada.

8. Exports from Canada are credited to the country to which they are consigned, whether that country possesses a seaboard or not. The country of consignment is the country to which goods are intended to pass, without interruption of transit, except in the course of transhipment or transfer from one means of conveyance to another.

9. The initials "N.O.P." mean "not otherwise provided for".

10. Some of the descriptions of articles used in this Report are abbreviated and incomplete, due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed Report of the Trade of Canada.

11. Throughout this Report, figures are subject to revision.

12. The Foreign Trade of Newfoundland is included as from April 1, 1949.

KEY TO ABBREVIATIONS OF COUNTRIES

Note:— The classification of Countries with a statement of the territorial limits used for statistical purposes will be found in Volume I of the Annual Report of the Trade of Canada.

U Kingdom	United Kingdom

Value, Price and Volume Indexes of Exports of Canadian Produce

The following table gives index numbers of the declared (statistical) value of exports of Canadian produce by months, and of the unit value (price) and volume of these exports. The value index expresses the value of exports in a given month as a percentage of the monthly average in the base year. The price index is of the fixed-weight aggregative (Laspeyre) type, and combines unit values calculated from the monthly export statistics with specified wholesale or other price quotations. These latter quotations are used where inadequate quantity reporting in the trade statistics prevents the obtaining of sufficiently representative unit value series. The volume index is derived by dividing the value index by the corresponding price index, and is, therefore, of the currently-weighted (Paasche) type. Until a suitable post-war reference base is determined for the Bureau of Statistics, these indexes will be computed with 1948 as an interim reference base.

In computing the price index certain minor adjustments were made to the regular grouping of commodities used in the trade statistics, and all three indexes are presented on the basis of these adjusted groups. The adjustments are as follows: the two groups "agricultural and vegetable products" and "animals and animal products" have been combined into one group now titled "agricultural and animal products"; the sub-group "rubber and its products" has been transferred to the "miscellaneous products" group; the item "ships" (9400) has been transferred to the "iron and steel and their products" group.

These indexes are currently computed from the original data for months and calendar years only. Approximate indexes for intermediate periods may be obtained by averaging the monthly values. Although such indexes will be less accurate than would result from a separate computation based on the original data, the margin of error is insufficient to justify a lengthy separate computation.

A complete record of these series by months for the post-war period is published in Volume I of the annual report "Trade of Canada". Some additional commodity information appears in issues of the "Review of Foreign Trade". Details of the computation of the price indexes are given in D.B.S. Reference Paper, No. 8, 1950, titled "Export and Import Price Indexes by Months, July, 1945 – June, 1950 (1948 = 100)".

Monthly Index Numbers of Declared Values, Prices and Physical Volume of Exports of Canadian Produce, by Groups
